About the Open Participation Online Survey

As part of its participation in The National Community Survey™, the City of Pasco conducted a mailed survey of 1,700 residents. Surveys were mailed to randomly selected households in December 2019 and data were collected through February 7, 2020 (see the report, *The National Community Survey: Community Livability Report, Pasco, WA, 2020*). The results from this main survey effort represent the most robust estimate of your residents' opinions.

After the above data collection period was underway, the City made available a web-based survey to its residents through a link on the City's website. Visitors to the site were able to complete the survey starting January 10 and 289 surveys were received. This report contains the results of this opt-in administration of the web-based survey. These data were not collected through a random sample and it is unknown who in the community was aware of link on the City's website; therefore, a level of confidence in the representativeness of the sample cannot be estimated. However, to reduce bias where possible, these data were weighted to match the demographic characteristics of the 2010 Census and 2017 American Community Survey estimates for adults in the City of Pasco.

The results of the weighting scheme for the opt-in survey are presented in the following table.

Complete Survey Responses to Online Open Participation Survey

The following pages contain a complete set of responses to each question on the survey. For questions that included a “don’t know” response option, two tables for that question are provided: the first that excludes the “don’t know” responses, and the second that includes those responses. The percent of respondents giving a particular response is shown followed by the number of respondents (denoted with “N=”).
